ZOOM – Kids on the Move for Climate Action 2019

Children in 13 countries joined forces again and achieved the highest result ever:

3,254,649 “Green Footprints”

They understood and showed that we all must act more now!

217,798 ZOOM-kids from Austria, Belarus, Estonia, Finland, Germany, Hungary, Italy, Luxembourg, Netherlands, North Macedonia, Poland, Switzerland and Sweden earned these footprints by using climate-friendly means of transport for their daily journeys to school or kindergarten, eating local, organic food and using energy sustainably.

ZOOM-kids know very well that they have to convince the politicians of the UN Climate Change Conferences to do their utmost to make climate protection a real priority all over the world! Not only in speeches but above all in action. Therefore many ZOOM-kids also started demonstrating for a better climate policy and joined the Fridays for Future movement.

The children emphasise that not only their children but already they themselves will have to pay dearly in the future if today's weak regulations aren't strengthened NOW!

**Together 217,798 children
in 13 countries collected
3,254,649 Green Footprints**

The children are more than concerned about the global climate and therefore sent all their wishes and concerns to the participants of the UN Climate Change Conference in Madrid.

They want to convince the adults to do their very best no matter where they are and whatever they do to take responsibility and save our world's climate!

This report can only give a glimpse at the ZOOM activities in 2019. For further information also visit www.zoom-kidsforclimate.eu

Photo: Landkreis Bayreuth

At the end of their climate protection and sustainability activity week(s), the children drew their own footprint on a piece of paper and wrote or sketched their wishes and concerns directed to the participants of the 25th UN Climate Conference in Madrid on them. As the kids know that local politicians have to act as well, they also handed over their results and demands to their mayors and local leaders as well as to ministers of the environment.

We are very thankful to **28,276 children** from **247 schools and institutions** who stuck **646,768 Grüne Meilen (Green Footprints)** into their albums or on posters in Austria!

The "Kids on the move" Campaign is being held for the 17th time in Austria. Many of the schools and kindergartens taking part are annual participants, but there have also been newbies joining in.

Like in the previous years the most dedicated collectors got honoured. The Volksschule Schöffern in Styria collected the most Footprints before summer holidays. The overall winner has been Volksschule Dafins from Vorarlberg. The kids collected for four weeks, interviewed their

grandparents about how they got to school and made suggestions for improvements.

A new addition is the "kindergarten-mobility box", full of materials to help deepen the understanding of the topic.

www.klimabuendnis.at/kindergarten-mobilitaetsbox

Some parents made extra efforts. They formed groups and accompanied the children. Everyday another parent.

Österreich

Es freut uns sehr, dass sich 2019 so viele Kinder und Pädagog*innen auf klimafreundliche Wege gemacht haben. Wir bedanken uns bei 28.2762 Kindern aus 247 Einrichtungen, die gemeinsam 646.768 Grüne Meilen gesammelt haben.

Die Klimameilen-Kampagne fand in Österreich bereits zum 17. Mal statt. Unter den teilnehmenden Bildungseinrichtungen sind viele „Stammkundinnen“, aber auch neue Schulen und Kindergärten konnten begeistert werden.

Die fleißigsten Sammler*innen erhielten auch heuer wieder Auszeichnungen. Die Volksschule Schöffern aus der Steiermark hatte bis zu den Sommerferien die meisten Meilen gesammelt. Der Gesamtsieg ging nach Vorarlberg an die Volksschule Dafins, die vier Wochen lang

Photo: Klimabündnis Österreich

sammelten, Großeltern nach ihren Schulwegen befragten und der Gemeinde ihre Verbesserungsvorschläge präsentierte.

Ergänzend wurde die Kindergarten-Mobilitätsbox beworben. Diese ist gefüllt mit Materialien zur vertiefenden Erarbeitung des Themas.

www.klimabuendnis.at/kindergarten-mobilitaetsbox

Manche Eltern bemühten sich besonders. Sie schlossen sich zu Gruppen zusammen und brachten gemeinsam die Kinder zu Fuß. Täglich ein anderer Elternteil.

Kindergartenpädagogin aus Scheibbs

Photo: Vorarlberger Mittelschule Frastanz

Belarus

Photo: School No.16, Orsha

This year **7 Belarusian municipalities** joined the ZOOM community. **304 children** from **5 to 12 years old** collected a total of **7,054 зялёных слядоў (Green Footprints)**.

Children from Baranovich, Braslav, Novogrudok, Novopolotsk, Orsha, Oshmiany and Pinsk collected Green, Red, and Blue Footprints for several weeks this year. During this time, they were also developing ideas for climate-friendly mobility. The children sketched their way to school, thought about how they would prefer to go to school and whether this is sustainable.

In **Novogrudok**, for example, the children made a small study: What type of travel do I prefer and why? Walking is best on short distances because you can talk to your friends, observe nature and animals, and it is also healthy.

Photo: Kindergarten No.3, Oshmiany

Photo: School No.3, Pinsk

In addition, wishes and ideas for a climate-friendly, sustainable future were collected. The pupils developed great proposals:

Photo: School No.7, Novogrudok

- Create more bicycle lanes
- Plant trees and create more green areas
- Create more opportunities for waste recycling and disposal
- Produce more electric cars
- Use less chemical fertilizers
- Install modern filters to factories in order to improve the quality of air and water

Photo: School No.16, Orsha

Photo: School No.4, Novopolotsk

Беларусь

У гэтым годзе **7 беларускіх муніцыпалітэтаў** далучыліся да ZOOM кам'юніці. У акцыі прынялі ўдзел **304 хлопчыкаў і дзяўчат**, якія сабралі **7,054 зялёных слядоў**.

Сёлета дзеці з Баранавічаў, Браслава, Навагрудка, Наваполацка, Оршы, Ашмян і Пінкса збіралі зялёныя, чырвоныя і блакітныя сляды. У гэты час яны распрацоўвалі ідэі для экалагічнай мабільнасці. Дзеці малявалі шлях у школу, думалі, якім чынам ім падабаецца перасоўвацца, і ці будзе гэта ўстойлівым.

Photo: School No.3, Pinsk

Напрыклад, у **Навагрудку** дзеці правялі невялікае даследаванне: Якому тыпу падарожжаў я аддаю перавагу і чаму? Хадзіць лепш на кароткіх адлегласцях, бо вы можаце пагаварыць з сябрамі, назіраць за прыродай і жывёламі, а таксама гэта лепей для здароўя.

Photo: School No.7, Novogrudok

Акрамя таго, былі сабраны пажаданні і ідэі для ўстойлівай будучыні. Дзеці распрацавалі выдатныя прапановы:

- Стварыць больш веладарожак
- Пасадзіць дрэвы і стварыць больш зялёных насаджэнняў
- Стварыць больш магчымасцей для ўтылізацыі адкідаў
- Выпускаць больш электрамабіляў
- Ужываць менш хімічных угнаенняў
- Усталёўваць сучасныя фільтры на заводах з мэтай павышэння якасці паветра і вады

Photo: Braslav Gymnasium

Germany

Photo: GS Renkenberge-Wipfingen, Lathen

Almost 115,000 children from over 230 communities took part this year in Germany - more than ever before! In total, children in 780 institutions collected together over 1,6 million Grüne Meilen (Green Footprints).

For the 18th time, children from all over Germany collected Green, Red and Blue Footprints. Many communities have been involved for several years, some even from the beginning in 2002. Again many projects and activities were carried out and so the action week(s) were varied and colourful. And of course there was strong support everywhere for the international climate strike and **Fridays for Future**. Even the youngest ones went demonstrating!

Photo: Kindertageseinrichtung St. Marien, Bonn

The Bischof-Ulrich-Schule in **Illertissen** has given itself a suitable motto for the year "Our world - the future is YOU!" Their Green Footprints were collected in October during the Sustainability Week.

Photo: Martin-GS, Bamberg
„All classes on the Martin-GS have renounced the sticker albums for environmental reasons.“

There were also many local handovers of results. Here, the wishprints with messages to the (local) politicians played an important role. Sometimes even the arithmetic skills of a mayor was asked as in **Pirna**, where he had to add up the total sum of Footprints himself.

The little climate protectors in **Reinbek** were so motivated that they additionally involved their partner schools in Finland and Estonia - because only together we will achieve a better climate worldwide!

In **Raunheim**, the collecting motto was "Mein Raunheim, das Klima und ich" (My Raunheim, the climate and me), and the extra designed climate mascot helped motivating all participants.

Photo: Primary Schule Mühlreider, Reinbek

In **Westerkappeln** many Wishprints were made and among other things this poem was written:

**"Dear Politicians!!
My feet may be very small
but climate action is for us all
Bees, flowers and butterflies -
Protect nature from the ground to the skies.
It's not about money and power,
the environment is the worry of the hour,
get that right, and you'll be my hero!"**

Deutschland

Fast **115.000 Kinder** aus über **230 Kommunen** beteiligten sich dieses Jahr in Deutschland – mehr denn je zuvor! Insgesamt sammelten Kinder in **780 Einrichtungen** gemeinsam **1,6 Millionen Grüne Meilen**.

Zum 18. Mal haben in diesem Jahr Kinder aus ganz Deutschland Grüne, Rote und Blaue Meilen gesammelt. Viele Kommunen sind schon seit mehreren Jahren dabei, einige sogar von Anfang an.

Es wurden wieder viele Projekte und Aktionen durchgeführt und so die Sammelwoche(n) vielfältig und bunt gestaltet. Und natürlich gab es überall große Unterstützung für den internationalen Klimastreik und **Fridays for Future**. Selbst die Kleinsten demonstrieren mit!

Photo: Heppenheim

Die Bischof-Ulrich-Schule in **Illertissen** hat sich gleich ein passendes Jahresmotto „Unsere Welt – die Zukunft bist DU!“ gegeben. Hier wurden im Oktober in der Woche der Nachhaltigkeit Grüne Meilen gesammelt.

Photo: Bischof-Ulrich-Schule, Illertissen

Auch lokale Meilenübergaben gab es viele. Hier spielten die Wunschfüße mit den Botschaften an die lokalen Politiker*innen eine wichtige Rolle oder auch schon mal die Rechenkünste des Bürgermeisters wie in **Pirna**, der die Meilen der Kinder selbst zusammenzählen musste.

Photo: Landkreis Bayreuth

Die Kleinen Klimaschützer in **Reinbek** waren so motiviert, dass sie noch ihre Partnerinnen-schulen in Finnland und Estland mit eingespannt haben – denn nur gemeinsam erreichen wir ein besseres Klima weltweit!

In **Raunheim** lautete das Sammelmotto „Mein Raunheim, das Klima und ich“, auch das eigens entworfene Klimamaskottchen war natürlich auch wieder mit dabei.

Photo: Pestalozzi Schule, Raunheim

In **Westerkappeln** wurden viele Wunschfüße gebastelt und u.a. dieses Gedicht verfasst:

**"Liebe Politiker!!
Meine Füße sind zwar klein,
doch Klimaschutz muss jetzt schon sein.
Bienen, Blumen, Schmetterlinge –
rette diese kleinen Dinge!
Denk nicht nur an Macht und Geld,
sondern an die Umwelt,
dann bist Du mein Held!"**

Hungary

Photo: ZOOM Campaign Hungary

Move for the Climate! 2019

In September and October, 80 schools with 18,609 pupils and 1,722 teachers took part! Also kindergartens have joined in this year. Thus children learn sustainable behaviour at an early age. All together they collected 310,722 zöld mérföldet (Green Footprints)!

Once again quite a lot of schools from all over Hungary were participating in the „ZOOM – Kids on the Move for Climate Action” campaign, organized by Climate Alliance Hungary.

In addition to collecting Green Footprints for climate-friendly journeys, the children could join a wide range of activities. These green activities were also considered in the final calculation. The motto of this year's campaign was 'Little Climate Ambassadors' which points out that also future generations have to play an important role in the process of climate change and that we all have a common responsibility to give them the possibility of growing up in a livable environment.

Photo: ZOOM Campaign Hungary

Photo: ZOOM Campaign Hungary

This year's focus was on teaching the children more about trees, climate change, sustainable mobility and local and vegetarian food.

Pupils could organize a climate strike in their school or take part in the global climate strike of 27th September. They were also asked to take photographs of a big "living picture" e.g. while hugging a tree. They could organize some small local events - such as exchange fairs, tree planting, bird-friendly design of their school yard, cooking clubs using local materials, etc. They could also draw their favorite tree or calculate the ecological and economic value of trees by using a special App.

Magyarország

Mozdulj a klímáért! 2019

Szeptemberben és októberben **80 iskola** **18,609 diákja** és **1,722 tanára** vett részt a kampányban; sőt, óvodák is csatlakoztak az eseményhez; s összesen **310,722 zöld mérföldet** gyűjtöttek össze!

Idén is számos iskola csatlakozott az ország minden tájáról a Magyarországi Éghajlatvédelmi Szövetség és a Reflex Környezetvédő Egyesület „Mozdulj a klímáért!” kampányához.

A környezettudatos utazásokon túl más feladatok közül is választhattak a résztvevők, így nemcsak zöld közlekedéssel lehet mérföldeket gyűjteni, hanem további tevékenységekkel is. Az idei kampány központi gondolata a „Klímakiskövetek”, volt, mely utal arra, hogy a jövő generációinak, a fiataloknak fontos szerepe van a klímaváltozás folyamatában és közös felelősségünk, hogy egy élhető környezetben nőhessenek fel.

Photo: ZOOM Campaign Hungary

Az idei kampány fókuszában a fák szerepe és értéke, a klímaváltozás, a fenntartható közlekedés, a helyi és húsmentes élelmiszerek álltak.

A diákok részt vehettek a szeptember 27.-i III. Globális klímasztrájkon vagy szervezettek helyi akciót ennek kapcsán. Készíthettek élőképet faölelésről; tervezhettek egy kisebb környezetvédelmi kampányt; megvalósíthattak helyi eseményeket – mint cserebere börze, fa és növényültetés, az iskolaudvar madárbarát kialakítása, főzőklub rendezése helyi alapanyagokból, stb. – lerajzolhatták kedvenc fájukat; vagy kiszámíthatták a fák ökológiai és ökonómiai értékét egy speciális applikáció segítségével.

Photo: ZOOM Campaign Hungary

Photo: ZOOM Campaign Hungary

Estonia

Photo: Laulasmaa Kool

In the primary school in **Laulasmaa** pupils from different grades participated in this year's ZOOM campaign and collected together **696 Roheline Jalajäljed (Green Footprints)**.

This year we are very happy to include Estonian Green Footprints for the first time. Thanks to their partner school in Reinbek, they have heard about the ZOOM campaign and immediately decided to take part this year, too.

Poster of class 4A in the beginning

Poster of class 2B at the end of their activity

Every day more and more stickers were added to their poster so the marked path was quickly covered by feet, bicycles, scooters and busses as well as with apples and energy saving lamps. The children were able to collect a total of 696 climate-friendly Footprints.

With this sum, for example, they would have walked from Laulasmaa through the whole of Estonia, via Latvia to Braslau, Belarus, where further kids were on the move in September. A great result and an impressive distance that could be covered with these Footprints.

Italy

Photo: South Tyrol

This year **10,006 Italian kids** took part in the **ZOOM – Kids on the Move for Climate Action** campaign. The little climate protectors from Italy have succeeded in collecting **221,020 Miglia Verde (Green Footprints)**.

In **Piacenza**, the pupils "drove" daily by pedibus to their institution and collected Green Footprints all year long. In the meantime, there are 21 different pedibus lines on which 337 children take part and thus 15,705 climate-friendly Footprints were collected on the daily way to their institution. One day the pedibus was accompanied by Jazz musicians and motivated the children for their daily walk to school. Also in **Formigine** pupils collected Green Footprints via pedibus in their everyday life.

Photo: Formigine

"YOU ARE LIKE ME: YOU ALLOW THE WORLD TO BREATHE" said the tree
Photo: Piacenza

On their way to school the 89 children and an alternating team of 41 adults used their "Bimbibus". Therefore they didn't cause any emissions on their way to school.

In addition there was a Festa degli Alberi (Festival of the Trees) in **Piacenza** to acknowledge the tree's value in the ecosystem. „See what I do for you (...) you are like me: you allow the world to breathe" said the tree.

In **South Tyrol** the coordinators of the campaign had a lot to do: twice as many children from 35 municipalities participated in 2019 and thus their result increased as well compared to last year: 99,449 Klimaschritte or Green Footprints!

Also the press reported about the ongoing activities during the campaign. One participating child stated:

"I think the project is good (...) you can do it more often (...) so you do the project every month for a week, because that's very, very great!"

Some of the children were able to handover their results to local politicians to raise more awareness for this topic.

The Italian municipalities will participate in the ZOOM Campaign again next year in order to have a lasting influence on the children's habits and to promote a more climate-friendly lifestyle.

Photo: South Tyrol

Luxembourg

Photo: Michel Rodange, Waldbillig

A total of **3.559 children** from **26 municipalities** took part in the campaign, so the **Green Footprints counter 2019** scored **58,886 Gréng Meilen** (Luxembourgish Green Footprints)!

Photo: Gaston Diderich, Luxembourg

This year the first kids "Op Kannerféiss d'uerch d'Welt" came from **Herperange**. These 'kids on the move' started their way in the Maison relais Hesper. They celebrated their 239 Gréng Meilen at the official opening event for the ZOOM campaign in April 2019. Their example was followed by many more children who together made it a great year for the ZOOM campaign.

The children of the Escher Kindervilla in **Esch-Alzette** not only took part in the campaign but also collected and professionally disposed rubbish in their surroundings – thanks a lot for this action!

In **Waldbillig**, the pupils of the Spielschoul also carried out an additional action during their climate project week: Many little detectives on the road took a close look at their everyday routes in and around Waldbillig.

The children were able to record a number of shortcomings as well as ideas for improvement.

Photo: Escher Kindervilla, Esch-Alzette

Miss die Breiten!

Luxemburg

**Insgesamt beteiligen sich dieses Jahr
3.559 Kinder aus 26 Kommunen
Der Luxemburger Meilenzähler steht auf
58.886 Gréng Meilen!**

In diesem Jahr ging es zuerst in **Herperingen** "Op Kannerféiss duerch d'Welt". Dort waren die kleinen Klimaschützer*innen des Maison relais Hesper unterwegs und haben gemeinsam 239 Gréng Meilen gesammelt! Diese haben sie zum offiziellen Kampagnenstart im April gleich mitgebracht und sich ordentlich vom Vorstand des Klima-Bündnis feiern lassen.

Die Kinder der Escher Kindervilla in **Esch-Alzette** haben nicht nur an der Gréng Meilen Kampagne teilgenommen, sondern darüber hinaus noch Müll in ihrer Umgebung aufgesammelt und fachgerecht entsorgt – vielen Dank dafür!

In **Waldbillig** haben die Schüler*innen der Spielschoul ebenfalls eine zusätzliche Aktion während ihrer Projektwoche durchgeführt: Viele kleine Verkehrsdetektiv*innen haben den Straßenverkehr in und um Waldbillig genau unter die Lupe genommen. Und das mit Erfolg! Einige Missstände und Verbesserungsideen haben die Kinder auf Fragebögen festgehalten.

Photo: Hollerich, Luxembourg

Wo gefällt dir etwas nicht?

Fußgängerstreifen sind nicht
genug beleuchtet. Meist im Winter

Welche Verbesserung schlägst du vor?

Vielleicht eine Lampe über den Zebra streifen
stellen.

Photo: Michel Rodange, Waldbillig

"The pedestrian crossings are not illuminated enough, especially in winter.
This can be changed quickly by installing lamps over the crosswalks, for example!"

Netherlands

Logo: Klimaatverbond

7,770 children from 34 schools in 21 municipalities took part in the ZOOM campaign. They collected a total of 35,742 Groene Voetstappen (Green Footprints)!

The pupils walked, rode their bicycles, scooters, or skateboards along the one kilometer average distance to school. If you add up both the children's outward and return journeys, they could have "circumnavigated" the world. Additionally, the children also collected Golden Footprints by taking short showers, eating vegetarian food, planting trees or collecting rubbish. Converted, they saved 23,000 kg of CO₂ emissions.

In **Heijen**, the pupils came up with a special idea for the presentation of their Groene and Gouden Voetstappen to their alderman: Two well prepared pupils asked him many questions on climate protection and sustainability.

Photo: Klimaatverbond

After solving this big riddle he had to find various puzzle pieces to finally be able to open the suitcase with the result. In this way, the pupils were able to demonstrate their commitment and even involve local politicians in their campaign.

Photo: Heijen

Kinderklimaatop 2019

In March 2019 they held the 11th National Children's Climate Summit in Den Hague. There Group 8b of primary school Leyenburg from Den Hague was awarded the Philip de Roo Prize for the best overall climate plan for their school. Among other things, it includes nature conservation areas and energy-saving measures, with ideas easy to implement. In addition, the student council, together with the director, will ensure that as many children as possible will be involved in its implementation.

Since 2019 the 17 SDGs, with the focus on the "green goals" 6,7,11,12,13,14 and 15, are the foundation for the Groene Voetstappen collectors when thinking about their future and creating ideas on how to become active.

Nederland

7.770 kinderen van 34 scholen in 21 gemeenten namen deel aan de ZOOM-campagne. Zij verzamelden in totaal 35.742 Groene Voetstappen!

De leerlingen in Nederland liepen, reden met hun fiets, scooter, inliner of skateboard over de gemiddelde afstand van 1 kilometer naar school. Als je zowel de heen- als de terugreis van de kinderen bij elkaar optelt, kunnen ze de wereld "omzeild" hebben.

Daarnaast verzamelden de kinderen ook Gouden Voetstappen door korte douches te nemen, vegetarisch voedsel te eten, bomen te planten of afval te verzamelen. Omgerekend bespaarden ze 23.000 kg.

In **Heijen** bedachten de leerlingen iets speciaals voor de bekendmaking van het resultaat. Twee leerlingen waren goed voorbereid om het bezoek van de gemeente te interviewen en veel vragen over klimaatbescherming en duurzaamheid te hebben voorbereid. Nadat ze alle belangrijke vragen hadden gesteld, moest de raadslid een groot raadsel oplossen en verschillende puzzelstukjes vinden om uiteindelijk de koffer met het resultaat te kunnen openen. Op deze manier konden de leerlingen hun betrokkenheid tonen en zelfs lokale politici betrekken bij hun campagne.

Photo: Klimaatverbond

Kinderklimaatop 2019

Groep 8b van basisschool Leyenburg uit Den Haag won de Philip de Roo-prijs tijdens de elfde kinderklimaatop. De groep van ongeveer 25 kinderen had niet alleen het beste totaalplan met onder andere natuurgebieden en energiebesparende maatregelen; de ideeën kunnen op korte termijn worden uitgevoerd. Daarnaast zal de leerlingenraad er samen met de directeur voor zorgen dat zoveel mogelijk kinderen kunnen deelnemen aan de uitvoering van het plan.

Sinds 2019 zijn de 17 SDG's, met de focus op de "groene doelen" 6,7,11,12,13,14 en 15, de basis voor de kinderen om na te denken over hun toekomst en om ideeën te creëren om actief te worden.

Photo: Klimaatverbond

North Macedonia

Photo: Jan Amos Komenski School

This year **275 pupils** aged 10 to 11 years old from Karposh municipality participated and collected **2,036 Зелени Стапалчиња (Green Footprints)**.

Again the NGO "Creative Center Karposh – CCK/ Креативен Центар Карпош – КЦК" coordinated the activities in all ten participating elementary schools: Jan Amos Komenski, Vlado Tasevski, Vojdan Cernodrinski, Bratstvo, Avram Pisevski, Dimo Hadzi Dimov, Petar Pop Arsov, Vera Ciriviri Trena, Hristijan Todorovski Karposh, Lazo Trpovski

Most of the "kids on the move" collected their climate-friendly Footprints during the European Mobility Week from 23.- 29. September.

Photo: Bratstvo School

Photo: Dimo Hadzi Dimov School

The children were active for the climate in many different ways:

- Drawing,
- Writing articles and songs,
- Demonstrating,
- Raising awareness by leaving info flyers on the cars' windshields,
- Recording critical traffic points around the school,
- Making Wishprints "If I were the mayor..."
- Creating exhibitions and digital galleries on the covered topic,
- Conducting interviews about how to improve the safety of pedestrians and cyclists,
- And of course: collecting **Green Footprints** by walking, cycling or skating to school

This year's campaign covered a variety of topics but the children mainly learned about sustainable means of transport, clean air and CO₂ pollution. Last but not least the kids thought about how to promote climate friendly behaviour and how to spread into action!

Photo: Avram Pisevski School

Photo: Vlado Tasevski School

Северна Македонија

Оваа година **275 ученици** на возраст (10-11) години од општина Карпош собраа **2035 Зелени стапалчиња**.

“Креативен Центар Карпош – КЦК” и оваа ги координираше активностите во сите десет општински училишта: ООУ Јан Амос Коменски, ООУ Вlado Тасевски, ООУ Војдан Чернотрински, ООУ Братство, ООУ Аврам Писевски, ООУ Димо Хаџи Димов, ООУ Петар Поп Арсов, ООУ Вера Циривири Трена, ООУ Христијан Тодоровски Карпош, ООУ Лазо Трповски

Главните активности се реализираа за време на неделата на мобилност од 23-29.09.2019 кога повеќето од учениците ги собираа Зелените стапалчиња одејќи пеш, со велосипеди, ролери и слично.

Photo: Bratstvo School

Photo: Jan Amos Komenski School

To Live in a clean and healthy environment.
Daria

Drawing: Bratstvo School

Учениците реализираа најразлични активности поврзани со климата ова се некои од нив:

- Цртаа цртежи
- Пишуваа состави и песни
- Павеа парада со пешачење за подигнување на свеста,
- Поставуваа флаери на прозорите на паркираните автомобили.
- Ги запишуваа критичните точки околу училиштето
- Дебатира на темата „Кога би бил градоначалник....“
- Подготвија изложби и дигитални галерии поврзани со темата,
- Павеа интервјуа за подобрување на безбедноста на пешаците и велосипедистите.
- И се разбира собираа **Зелени стапалчиња** преку пешачење, возење велосипеди и возење ролери до училиште.

Оваа година кампањата покри различни наслови поврзани со темата. Главно беше тоа што учениците учеа што значи одржлив транспорт, чист воздух и загадување со CO₂. Но, најважно од се беше тоа што учениците научија како да преземат акција за промени и како да бидат модел на добро однесување за да се спречат штетните климатски промени.

Poland

Photo: Wydminy

During their activity week they also occupied themselves with the topic of global warming. The recent situation also provided a good illustration of the phenomena: October 2019 was remarkably and unusually warm in Poland. The children were able to experience and better understand the process of global warming and thereby also learn about possible forms of climate change.

Photo: Wydminy

This year, children in Wydminy and Elk have been working for a better climate and collected Green Footprints as well. 3 classes, a total of **104 pupils** have made their way to school in a climate-friendly way and also paid attention to eating regional food and using energy efficiently. They were able to collect a total of **2.724 zielonych stóp (Green Footprints)**.

Photo: SP4 Elk

Forest treasure trove: 13-14 year old young teens in **Wydminy** have also carried out various activities in the project "Once Upon a Time" to get to know the local forest better. They took a closer look at several plants, collected many wild herbs with healing properties and also discussed the topic of "super food". In the "forest treasure trove", the children not only got to know the flora with all their senses, but also used their knowledge to create a small guide on "local super foods". Thus, future school trips to the nearby forest will also benefit from this. A great action, which was a lot of fun for the children!

** sponsored by Polish -American Freedom Foundation and managed by Nida Development Foundation*

Polska

W tym roku dzieci z Wydmín i Elku pracowały na rzecz lepszego klimatu i zebrały również Zielone Ślady. 3 klasy, w sumie **104 uczniów** podróżowało do szkoły w sposób przyjazny dla klimatu, a także zwróciło uwagę na spożywanie regionalnych potraw i efektywne wykorzystanie energii. Udało im się zebrać łącznie **2.724 zielonych stóp (Green Footprints)**.

Photo: Wydmín

Photo: SP4 Elk

W trakcie tygodnia aktywności uczestnicy zajmowali się również tematem globalnego ocieplenia. Tegoroczna jesienna aura stanowiła dobrą ilustrację tych zjawisk: Październik 2019 r. był w Polsce niezwykle ciepły. Dzieci mogły doświadczyć i lepiej zrozumieć proces globalnego ocieplenia, a tym samym poznać możliwe formy zmian klimatycznych.

Leśny skarbiec : Młodzież w wieku 13-14 lat z **Wydmín** prowadziła również różne działania w ramach projektu "Once Upon a Time", aby lepiej poznać miejscowy las. Uczestnicy przyjrzyli się bliżej kilku roślinom, zebrali wiele dzikich ziół o właściwościach leczniczych, a także omówili temat "super pożywienia". W "skarbcu leśnym" dzieci nie tylko poznały świat roślin wszystkimi zmysłami, ale także wykorzystały swoją wiedzę do stworzenia małego przewodnika po "lokalnej super żywności". Tak więc, przyszłe wycieczki szkolne do okolicznych lasów, również na tym skorzystają. Wspaniała akcja, która była świetną zabawą dla dzieci!

33.979 students from more than 230 schools from 102 different municipalities were collecting more than 330,970 Grön Footprints (Green Footprints) in Sweden.

The campaign, organized by Trafik Kalendern, wants to inspire pupils, parents and teachers to travel in a smarter and healthier way – simply by walking, cycling and public transport! The goal is to create a greater road safety in the immediate vicinity of children (“för bättre trafiksäkerhet i barnens närmiljö”) and to contribute to a better environment, too.

During any two weeks in September and October, the participating schools gather as many *respoäng* (travel points, divided into "Gröna e Orange Prickar") as possible by using climate-friendly means of transportation in everyday life.

In 2019 there were 232 schools involved and of course cycled, walked or used public transport for their journeys to school. As they gathered until the end of November we didn't have their final number when the Climate Conference started. But up to here they already achieved an impressive result!

Besides collecting 'gröna e orange Prickar' some schools could compete with other schools in a municipal competition to win a local prize, organized from the corresponding commune e.g. Tyresö, Hudiksvalls, Uppsala and many more. The winners are awarded with prize money for the school.

Kids on the Move for Climate Action in 2019

The 2015 UN Climate Conference in Paris was decisive for the future of international climate policy. There countries set a now globally agreed goal, limiting temperature rise to no more than 2°C and ideally no more than 1.5°C. At the 2017 Climate Summit in Bonn, countries delved deeper into the process of outlining how they will actually achieve the targets they have set themselves. It is in everyone's interest, that the resulting plans are truly implemented.

We hope that COP 25 will be “the COP of implementation” as Ms. Carolina Schmidt Zaldivar, Minister of the Environment of Chile and President-Designate for the 25th UN Climate Change Conference, stated. No matter what happens in Madrid – ZOOM-kids will be on the Move for a better climate to push politics even further next year!

Join us in 2020, when children across Europe begin collecting Green Footprints again!

2020 Green Footprints for the global climate

Actively explore everyday paths in a fun way; complete trips quietly on foot or zoom along by scooter, embark on a journey around our One World, learn about how children from across the globe get to school – the **ZOOM – Kids on the Move!** campaign offers all this and much more.

Every journey covered in a climate-friendly manner – on foot, by scooter or bike, bus or train – counts as a Green Footprint during the campaign week. You are free to decide when to begin.

Collecting Green Footprints allows the children to reflect on the subjects of climate change, mobility and sustainability in a playful way while making their own **contributions to global climate protection**.

Climate Alliance will be once again presenting the Green Footprints collected by all participating children to politicians by the end of 2020 during the next UN Climate Change Conference.

The campaign modules and materials provide concrete ideas for planning and implementing mobility weeks. These can be complemented with activities from the blocks on “climate-friendly food”, “saving energy” and the “fair and climate-smart procurement of art and school supplies” to collect additional red and blue footprints. Get involved and collect Green Footprints together with other children's facilities in your town, city or municipality! Request support from national and international partners (the materials are available in several languages).

ZOOM – Kids on the Move for Climate Action 2019

ZOOM is Climate Alliance's annual campaign for kindergarten and elementary school children on sustainable mobility and the climate of our "One World."
Since 2002, far more than 2,5 million children in 41 countries have ZOOMed and collected

Green Footprints, Grüne Meilen, Klimameilen, Groene Voetstappen, Miglia Verdi, Gréng Meilen, Зелени Стапалчиња, Roheline Jalajäljed, Vihreät jalanjäljet, Zöld Mérföldet, Zielonych Stóp, Klimaschritte, Grön Footprints, зеленых следа,...

by using climate-friendly means of transport for their daily journeys.

With their Green Footprints, the participating children go on a "Joint Climate Voyage" around the world. This symbolic journey starts at the UNFCCC Secretariat in Bonn, Germany. Travelling once around the world, the journey then ends at the annual UN Climate Conference where the children's Green Footprints, wishes and concerns are presented to the participants and decision makers.

The ZOOM-kids from all over Europe very much hope that their work encourages the adults at the UN Climate Conference to ZOOM in and take more concrete steps on the global fight against climate change!

Climate Alliance

For more than 25 years, Climate Alliance member municipalities have been acting in partnership with indigenous rainforest peoples for the benefit of the global climate. With over 1,700 members spread across 26 European countries, Climate Alliance is the world's largest city network dedicated to climate action and the only one to set tangible targets: each member city, town and district has committed itself to reducing greenhouse gas emissions by 10 percent every 5 years.

Recognising the impact our lifestyles can have on the world's most vulnerable people and places, Climate Alliance pairs local action with global responsibility. The network fosters cooperation with indigenous peoples, runs awareness raising campaigns and develops tools for climate action planning. It provides ample opportunity for participation and exchange while representing member interests at the national, European and international levels.
